## DETAILED ACTION

### *Election/Restrictions*

1. **Claim 1** is allowable. **Claims 2-3**, previously withdrawn from consideration as a result of a restriction requirement, requires all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between species (1) and (2), as set forth in the Office action mailed on 07 October 2009, is hereby withdrawn** and **claims 2-3** are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
2. **Claims 14-31** were withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **with** traverse in the reply filed on 03 November 2009. Presently, **claims 14-31** have been cancelled at Applicant's request, filed 04 May 2010.

### *Specification*

3. The amendment to the Title overcomes the previous objection, has been approved and entered, and the objection is withdrawn.

***Claim Objections***

4. **Claim 13** was objected to because of informalities, the amended **claim** corrects the informalities and the objection is withdrawn.

***Response to Amendment***

5. **Claim 1** has been amended to incorporate additional structural limitations.
6. **Claim 5** has been cancelled as requested.
7. **Claims 6-7** have been amended to correct dependencies and other informalities.
8. **Claims 10-12** have been amended to incorporate the limitations of the independent claim and intervening claims.

***Allowable Subject Matter***

9. **Claim 1** is allowed as amended.
10. **Claims 10-12** are allowed as amended, having incorporated the limitations of the independent claim they were previously dependent on, as well as the intervening claims.
11. **Claims 4, 8, & 9** are allowed as presented, dependent on **claim 1**.
12. **Claims 6-7 & 13** are allowed as amended, dependent on **claim 1**.
13. **Claims 2-3** are allowed as rejoined, dependent on **claim 1**.
14. The following is an examiner's statement of reasons for allowance:
  - a. As related to independent **claim 1**, an additional search was conducted based on the amendments to the claim and the existing prior art of record as well as additional

Art Unit: 2861

related art fails to teach or fairly suggest a method for use in an ink-jet printer comprising all of the specific features and limitations as recited, in combination with and particularly including applying radiation-curable ink along a first print line in a first direction and applying radiation-curable ink along a second print line in a second direction while applying from a single radiation source first curing radiation along the first print line directed toward the second direction and applying first curing radiation along the second print line directed toward the first direction.

b. As related to dependent **claim 10** and further dependent **claim 11**, a substantial search was conducted and the related art and prior art of record fails to teach or fairly suggest a digital inkjet printing method wherein the directing of the first curing radiation incorporates all of the limitations as currently claimed, particularly, but not limited to directing the first curing radiation coming from the radiation source to **either one of first and second mirrors** accommodated in a spaced-apart relationship **along an axis of the print line at apposite sides of the print head assembly**, each of the first and second mirrors being oriented to reflect radiation impinging thereon towards the location on the print line. While furthermore, directing the radiation to a mirror rotatable between first and second orientations of its reflective surface to face the first and second mirrors.

c. As related to further dependent **claim 12**, a substantial search was conducted and the related art and prior art of record fails to teach or fairly suggest a digital inkjet printing method which selectively directs the curing radiation while incorporating all of the limitations as currently claimed, particularly, but not limited to the curing radiation is selectively directed from the radiation source towards **either one of first and second**

Art Unit: 2861

**radiation splitting elements**, each splitting the radiation impinging thereon into first and second radiation portions.

15. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

16. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakajima (US 6,910,764 B2) teaches an image recording method and apparatus with a single radiation source and a radiation director for curing the ink. Kilburn et al. (US 7,638,780 B2) teaches a curing apparatus and method which uses multiple radiation sources and radiation directors.
